1.1 Background and Purpose

Following the success and positive public response to the 'Haldimand County Streetscape Plan and Urban Design Guidelines', approved January 25, 2010, the County made the decision to undertake a Rural Streetscape Plan (RSP) for a number of hamlets throughout the County.

The purpose of developing detailed streetscape concepts and plans for specific hamlets and implementing these plans is to beautify the public realm and help to stimulate private sector property investments within a specific area.

1.2 Study Objectives

The Rural Streetscape Plan will set out the streetscape kit of parts, concepts and details for coordinated public streetscape spaces, pedestrian and bicycle connections, public amenities, and open spaces as they interface with and transition to adjacent buildings and the surrounding community. Key objectives include:

 Coordinated streetscape design as part of a structured public realm improvement program

- Stimulate private sector investments of private property
- Improve physical and visible qualities of the hamlet
- Protect and enhance attributes of historical crossroads
- Promote economic development by increasing opportunities for shopping, tourism, employment and living in a hamlet

1.3 Overall Study Process

The Rural Streetscape Plan was conducted over three phases.

Phase One – Background Research, Hamlet Identification and Site Analysis was launched in May 2012. Background reports, mapping and related research were reviewed and synthesized together. Working with the County, a series of principles and selection criteria were developed upon which to identify applicable hamlet communities requiring detailed streetscape plans. Comprehensive hamlet walkabouts were undertaken in June 2012 with local community members in order to gain insider insight into each hamlet. Key opportunities, constraints and improvement initiatives were identified for discussion and serve as a foundation for the preparation of the Rural Streetscape Plan.

Phase Two – Draft Rural Streetscape Plan

focused on the preparation of draft Rural Streetscape Plan for the hamlets for review and evaluation. This included a standard set of conceptual streetscape components or "kit of parts" to be implemented in all of the selected hamlets. The draft Rural Streetscape Plan for each hamlet were presented at two community open house meetings, held on September 26th, 2012.

Phase Three – Final Rural Streetscape Plan

focused on revising and refining the plans for each hamlet and developing the final document, including an implementation strategy and capital development costs for the improvements.

1.4 Hamlet Selection Criteria

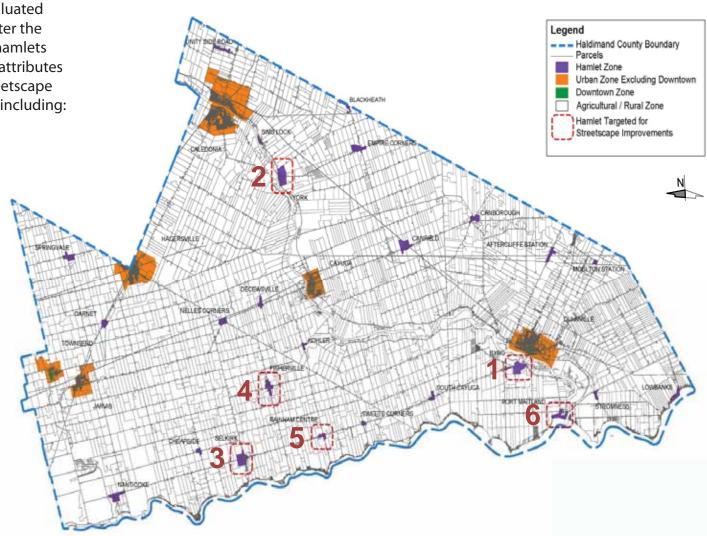

In order to determine which hamlets would be targeted for the Rural Streetscape Plan, a number of selection criteria were developed through collaboration between County staff and the Consulting Team. Once the criteria was finalized, site visits to all of the hamlets within the County were undertaken and each hamlet was graded in order to determine the hamlets that would be targeted for the Rural Streetscape Plan. The selection criteria is listed as follows:

1.5 Targeted Hamlets

In total, there are 25 hamlets in the County, all of which were visited and evaluated against the selection criteria. After the evaluation was completed, the hamlets that had the highest number of attributes were identified for the Rural Streetscape Plan. 6 hamlets were identified, including:

2.1 Street Furnishings

Street furniture includes elements such as benches, bicycle racks, litter and recycling receptacles, etc. These elements complement the street by providing a comfortable pedestrian scale environment. Street furniture shall be strategically located within the pedestrian realm to enhance their function and convenience while complementing the needs of all users. Wayfinding signage shall also be located at the main intersection of the hamlets to provide direction and orientation for nearby amenities.

Benches shall be durable and be made of metal. Benches should typically be long enough to accommodate 2-3 people comfortably, and should have backs and arm rests.

Litter and recycling receptacles shall be of a consistent design style, be equipped with plastic liners, have rain proof tops and be easily accessible for emptying.

The street furniture will be consistent throughout the 6 hamlets that are included in the Rural Streetscape Plan. Variations will occur in theming colours, which can be expressed through banners, planting, gateway, intersection and crosswalk treatments.

The installation of trash receptacles shall align with current service levels where such service presently exists. Existing fixtures shall be replaced to ensure cohesive public realm. Where service does not presently exist, the Count will consider providing such enhancement upon review of scale and feasibility.

Light / Banner Pole

Existing Metal Bench

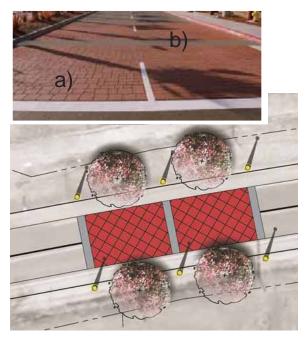

Trash Receptacle

Planter

2.2 Gateway and Intersection Treatments

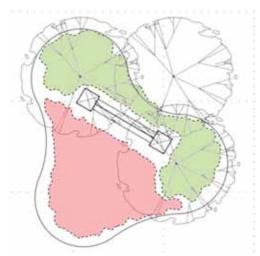

Hamlet gateways will provide a distinct sense of place and arrival for those entering each of the hamlets. The gateway sign and gateway and crosswalk treatments are recommended to convey the unique theming, colours and heritage identified for each of the hamlets.

3.1 Hamlet Overview

York is a large hamlet, 98 hectares in land area, located at the intersection of Front Street (Haldimand Road 54) and Haldimand Road 9 in the north central area of Haldimand County.

Situated on the Grand River, York was initially the site of a flour and grist mill (c. 1820s) that served the area for almost a century. The original mill had a water wheel operated by water from the dam at York built by the Grand River Navigation Co. (a company formed to make the Grand River navigable for larger vessels).

3.2 Unique Qualities

- Serviced with water
- Significant crossroads within the County
- York is a landing point for the Day of 1000 Canoes Festival
- 2 churches and 1 community centre
- Antique society located here (operates out of historic St. John's Parish Hall)
- Rotary Riverside Trail terminates in York
- Heritage building on Front Street (1862) - originally Enniskillen Lodge, later Barber Hotel of York
- Farm Vendor stand in summer /fall months

3.3 Key Issues

- Lack of sidewalk on west side of Front Street
- Existing 1 metre wide sidewalks (east side of Front Street) are in poor condition and undersized
- Sidewalk is fragmented, especially in front of gas station - pedestrian safety is a concern
- Lack of pedestrian lighting
- Traffic travelling at speeds in excess of posted limit (50 km/hr) into / through York is a concern for pedestrian safety
- Heavy traffic on Front Street including trucks and farm vehicles
- Overhead wires block view corridors along street and to the Grand River, and are unsightly
- Park and entrance is somewhat hidden on approach from north
- Park parking area is in need of organization and upgrading
- 50 lot subdivision is planned at northeast end of the hamlet (increase in population)

Enniskillen Lodge, 1862

Visual Inventory 3.4

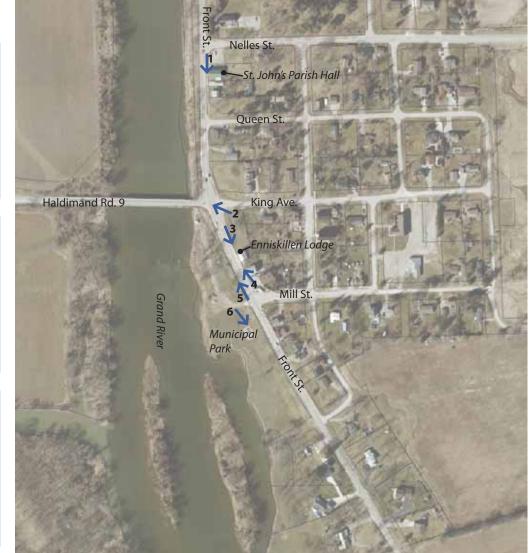

St. John's Parish Hall

Front Street and Haldimand Rd 9

Narrow sidewalks on east side of Front St.

Municipal park, looking south

3.5 **Opportunities**

Circulation

- Gateway expression and traffic calming opportunities at Front Street and King Avenue intersection
- Sidewalks on both sides of Front Street
- Investigate "Complimentary Crossing"
 informal/uncontrolled crossings
 (proposed to be used in other areas,
 i.e., Jarvis) for intersection at Front and
 Mill Streets
- Riverside trail extension to the south
- Potential connections between planned subdivision and hamlet centre, park and Grand River

Identity

- Enhance historic crossroads within York
- Gateway feature at Front Street and Haldimand Road 9
- "Bracket" the community with an indication of a strong pedestrian realm utilizing a variety of techniques that may include narrowing the lane width, widening sidewalks, street tree planting, decorative pedestrian crosswalks, stop signs, street furniture, on-street parking, etc.

Amenities

- Pedestrian lighting on east side of Front Street
- Wayfinding signage related to riverside trail and cycling routes
- Park improvements pedestrian connections, signage, picnic benches, organized parking area, improved accessibility, and interpretive elements related to former mill and dam on Grand River
- Former Enniskillen Lodge building and property to the south are potential candidates for property improvements

Programming

- Celebrate river navigation heritage in York
- Capitalize on Farm Vendor stand at St. John's Parish Hall
- Potential for events through Antique Society
- Promote York as a service centre along the Grand River Scenic Parkway
- Promote York as an access point for fishing in Grand River

Environmental

Protect and enhance natural areas in

York, in particular those adjacent to the Grand River

• Enhance view and vistas to the Grand River as well as access for fishing

Big Moves

- Traffic calming measures and pedestrian-oriented amenities on Front Street (specialty paving at intersections and crosswalks, pedestrian lighting, benches, continuous sidewalks, etc.)
- Park improvements organized parking, improved accessibility, enhanced viewing of the Grand River

Potential Design Direction

- River navigation heritage theme
- Industrial mill heritage theme

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

of the County.

The hamlet of Byng is situated on the west bank, across the Grand River from Dunnville, and in proximity to the Byng Island Conservation Area, a popular location for bird watching, fishing and non-motorized boating.

Hamlet Overview

of 67 hectares of land, located at the

intersection of Rainham Road and Port

Byng is a relatively large hamlet comprised

Maitland Road in the south eastern portion

Rainham Road in Byng dates back to 1827, when a transportation route was cut through the woods to enable settlers in Rainham and Walpole who wanted to bring their grain to the mills in Dunnville at the site of the new dam.

bring their grain to the mills in Dunnville the site of the new dam.

4.2 Unique Qualities

- Significant crossroads within the County
- Local horticultural society active with planting displays in traffic islands
- Grand River Kayak very busy and popular commercial destination
- Proximity to Dunnville
- Proximity to Dunnville Airport (No. 6 RCAF Dunnville Museum)
- Proximity to Byng Island Conservation Area and the Grand River
- 1 elementary school and 1 church (church is located outside of core area)

4.3 Key Issues

- Road is super-elevated and engineered for speed - lack of traffic calming measures
- Narrow public spaces sidewalks directly adjacent to road and property line
- High levels of truck traffic due to nearby quarry and airport on Port Maitland Road
- Limited commercial uses (gas station, auto repair shop, Grand River Kayak)
- Lack of parking (on-and off-street)
- Proximity to Dunnville may influence the potential for further commercial development
- Recently closed restaurant (Grand Island Bar BQ) on island was a major attraction for the area during summer months

Byng Bridge (undated)

4.4 Visual Inventory

4.5 **Opportunities**

Circulation

- Organized parking and possible sidewalk on road right-of-way leading to Grand River Kayak
- Investigate the need for the "pork chop" islands at main intersection - potential for increased pedestrian space
- Enhanced pedestrian linkages to school and Byng Island Conservation Area
- Traffic calming measures may include narrowing the roadway, pedestrian paving at crosswalks, street tree planting, on-street parking, etc.
- Consider re-routing quarry traffic to create a safer, more pedestrian oriented hamlet centre

Identity

- Enhance the historic crossroads within
 Byng
- Address the need for streetscape elements and furnishings that will enhance the pedestrian experience
- Pedestrian focus at main intersection (Rainham Road and Port Maitland Road)
- Enhance arrival at north, east and west approaches to Byng

 Potential for similar street treatment (i.e., gateway feature) on north side of bridge

Amenities

- Viewing / lookout and seating area(s) at bridge - both sides
- Wayfinding signage related to local amenities, trail and cycling routes
- Potential site for village square County owned parcel on south east corner of Rainham Road and Port Maitland Road

Programming

- Create more reasons to stop rather than drive through Byng
- Promote Byng's proximity to natural heritage features (Grand River and Conservation Area)
- Encourage outfitter / active recreation retailers to locate here
- Promote Byng as a service centre for County cycling routes

Environmental

- Enhance connections to Grand River
- Protect natural areas surrounding the Grand River and Byng Island Conservation Area

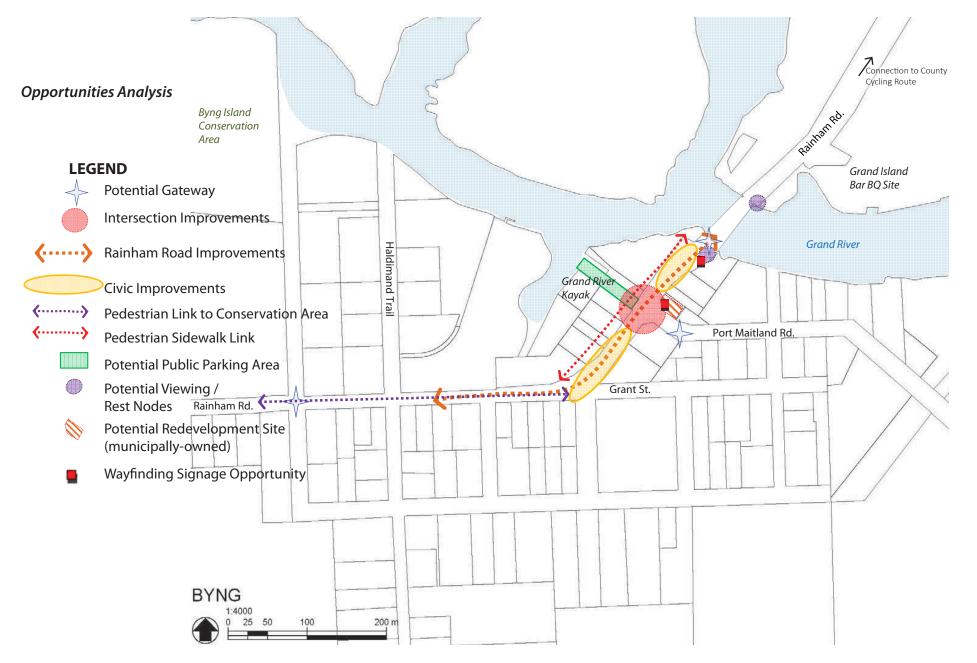

Big Moves

- Traffic calming measures and pedestrian-oriented amenities on Rainham Road (specialty paving at intersections and crosswalks, pedestrian lighting, benches, continuous sidewalks, etc.)
- Organized public parking area near Grand River Kayak
- Viewing area / rest node at both ends of bridge at Grand River
- Public square on municipally-owned property at Port Maitland Road and Rainham Road

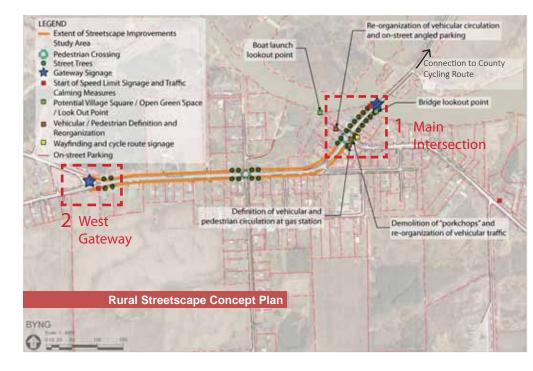

Potential Design Direction

- Natural heritage theme
- Aviation heritage theme

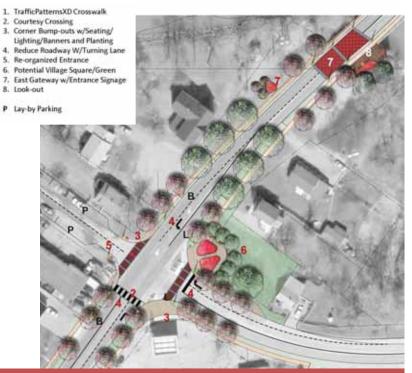

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

THEMES: •Reflect the natural and cultural history of the Grand River •Use LED Lighting •Use of accent colours of red, yellow and orange in banners and planting 5.1 Hamlet Overview

Selkirk is a relatively large hamlet comprised of 73 hectares of land, located at the intersection of Rainham Rd (Main St E within Selkirk) and Haldimand Rd 53 (Erie St S) in the south west area of the County.

Selkirk is the oldest village in former Walpole Township. Settled by the Hoover family around 1800, the village was the site of a mill and an important centre for the local farming community. At various times, Selkirk has had a fishery, an apple evaporating factory and a famous hotel, the Bluewater. During the War of 1812, a number of American sympathizers were active in the area. Some were hanged for treason at the "Bloody Assize" in Ancaster in 1814. Captain William Francis, a prominent militia leader who lived near Selkirk testified at the proceedings was later murdered in retaliation.

L.H. Effinger house, 1932

5.2 Unique Qualities

- Defined village centre and significant historic crossroads within the County
- 4 corners 4 way stop at main intersection
- Strong community identity (chamber of commerce, lions club, etc.)
- Seasonal flags and flowers in baskets on all 4 approach roads into town (from Bridge to Firehouse on Main Street / from Church to Kent St. on Erie St.)
- Proximity to Lake Erie and Selkirk Creek
- Cooper-Fess Residence (1870) Second Empire style architecture
- Library and community centre in heritage school building (S.S #3 Union School built in 1918)
- Park (baseball diamond, pavilion, outdoor skating rink with gravel base)
- War memorial gates to Selkirk Park
- 9 retail businesses including cafe, bank, hair salon, general store, LCBO outlet, vehicle repair shop, etc.
- Fire Hall, 3 churches
- Sidewalk / boulevard space identified
- Mural located on south east corner on side of building showing "Drilling Rig" (additional mural on south west)
- Selkirk as service centre for large cottage population / snowbirds

5.3 Key Issues

- No water service
- Vacant property at main intersection (former Blue Water Hotel)
- Existing interlocking brick splash strip at road and sidewalk curbs in need of repair - safety concerns
- Heritage building (CIBC satellite site) in need of repairs / facade restorations and improvements
- Grade change (slope) on west (north and south) side of Erie Street

5.5 **Opportunities**

Circulation

- Delineate on-street parking
- Improve pedestrian linkages to park, library and community centre
- Enhance pedestrian and cycling linkages to Lake Erie, Selkirk Creek, and Selkirk Provincial Park
- Traffic calming measures may include narrowing the roadway, pedestrian paving at crosswalks, street tree planting, on-street parking, etc.

Identity

- Enhance the historic crossroads within Selkirk
- Strengthen the four corners with specialty paving at intersection
- Preserve and enhance the historical presence of natural gas and agriculture

Amenities

- Potential redevelopment site on vacant lot on north east corner (former Bluewater Hotel property). This property is currently privately owned.
- Wayfinding signage related to local amenities, trail and cycling routes

- Outdoor rink has potential to become multi-use court area in summer months
- Upgrades to current streetscape furniture and planters
- Investigate the need for pedestrian lighting
- CIBC building and former Home Hardware are potential candidates for property improvements

Programming

- Enhance current seasonal elements banners and streetscape plantings
- Potential theming element natural gas; "Gas Festival" (originally festival was themed on sports, then country / farm, now natural gas)
- Promote "natural gas" relationship with Rainham Centre and the Canadian Drilling Rig Museum
- Promote Selkirk as a service centre for County cycling routes

Environmental

- Protect and enhance Selkirk Creek
- Promote Selkirk as a bird watching and sport fishing area in relation to Selkirk Provincial Park

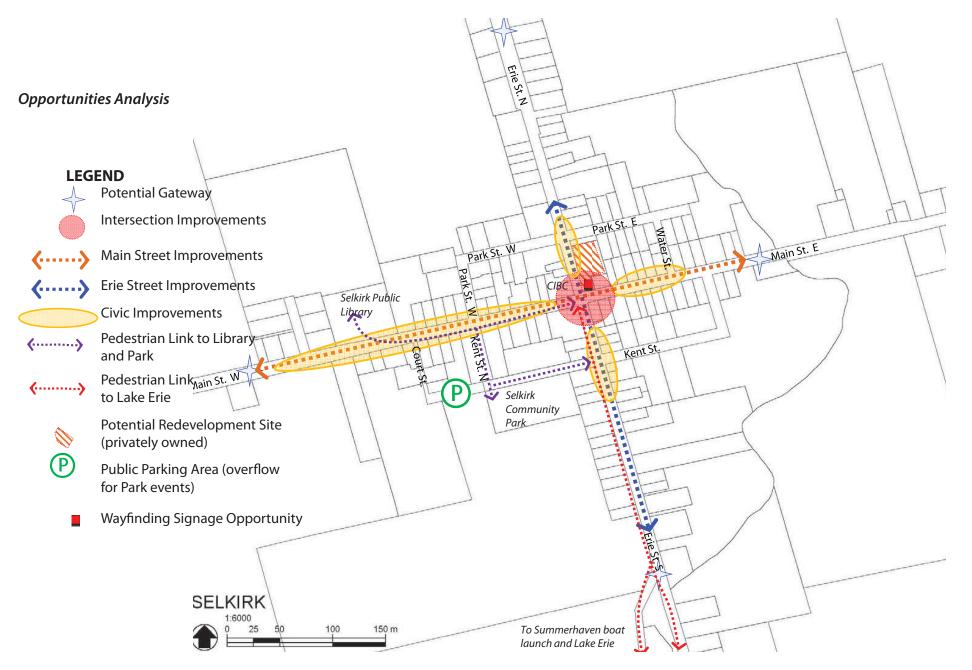

Big Moves

- Traffic calming measures and pedestrian-oriented main intersection utilizing specialty paving, clearly defined crosswalks, streetscape amenities (lighting, benches, planting, garbage / recycling receptacles, etc.)
- Address accessibility issues on Erie Street (sloped sidewalk)
- Clearly define parking areas (on-street and off-street)

Potential Design Direction

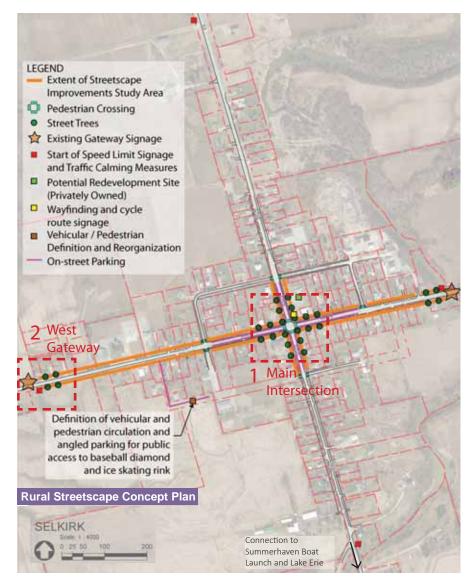

- Natural gas and drilling theme
- Shopping and retail
- Recreation theme

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

6.1 Hamlet Overview

Fisherville is a mid-size hamlet, 44 hectares of land in size, located at the intersection of Erie Avenue / Fisherville Road (Haldimand Road 12) and Main Street (Concession Road 5) in the south central portion of the County.

The community was settled in the early 1800s by German and Alsatian Lorraine settlers and was first known as Bunker Hill. Many of the settlers had little experience in clearing land, but learned by diligence. Erie House tavern opened in 1853 (now Ye Olde Fisherville Restaurant), while the post office opened in 1863.

Erie House Tavern (undated)

6.2 Unique Qualities

- Significant historic crossroads within the County
- Historic tavern building (1853) houses Ye Olde Fisherville Restaurant today
- Charles Reicheld House (1885), a bracketed style brick farmhouse located on Erie Ave. north of Main St.
- Fisherville District Lions Community Centre (largest in County)
- Canada Post Outlet
- Agricultural properties nearby
 (greenhouses, cattle farm)
- New small subdivision located behind community centre
- Wide road right of ways
- Parking located on both sides of the street (Main Street and Erie Avenue)
- Mature street trees throughout

6.3 Key Issues

- Undefined boulevard space along Main Street
- Issue regarding adequate signage on Highway 3 and 20 for Fisherville need to differentiate between main intersections of Fisherville (Main Street West and Erie Avenue South) and Selkirk (Main Street West and Erie Street South)
- Lack of unique hamlet character at the four corners
- Overhead wires and poles at the four corners are visually unpleasing
- Heavy truck traffic through Fisherville
- Vehicular entrance to community centre is vast and undefined

Fire Hall (undated)

6.4 Visual Inventory

Ye Olde Fisherville Restaurant

6.5 **Opportunities**

Circulation

- Pedestrian connections / entrance to community centre
- Pedestrian links between the new residential development, community centre and the main intersection. The link north of community hall to new residential would require partnership or legal agreement with landowner as it is currently privately owned
 Traffic calming measures may include narrowing the roadway, pedestrian paving at crosswalks, street tree planting, on-street parking, etc.

Identity

- Enhance the historic crossroads within Fisherville
- Preserve and enhance the historical and agricultural character of Fisherville with building facade improvements -German carpentry
- Pedestrian-oriented main intersection (four corners approach)
- Define the right of way clearly delineate parking areas, pedestrian areas and driving lanes

Amenities

- Seating areas at main intersection
- Wayfinding signage related to local amenities, trail and cycling routes
- Pedestrian lighting
- Floral displays / plantings

Programming

- Promote Fisherville as a service centre for County cycling routes
- More events that celebrate the agricultural presence in Fisherville Provide a venue for local agricultural establishments to sell their goods (i.e. Farmer's Market at Community Centre)

Environmental

 Preserve existing mature street trees to provide shade

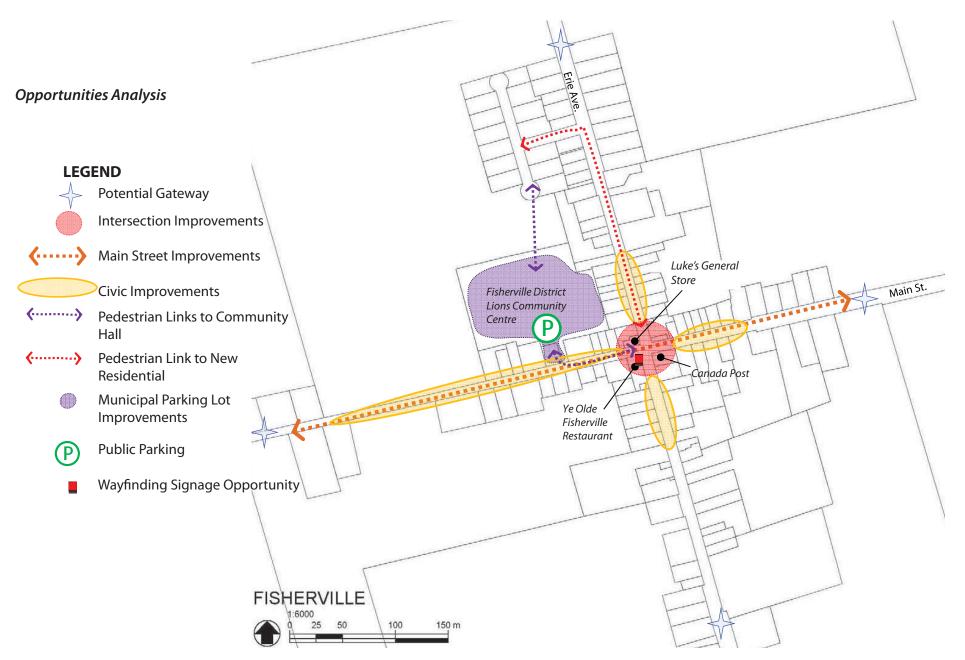

Big Moves

- Organize right-of-way space on-street parking, pedestrian realm, boulevard area
- Traffic calming measures and pedestrian-oriented main intersection utilizing specialty paving, clearly defined crosswalks, streetscape amenities (lighting, benches, planting, garbage / recycling receptacles, etc.)
- Clearly defined pedestrian entrance to Community Centre / reorganization of vehicular entrance

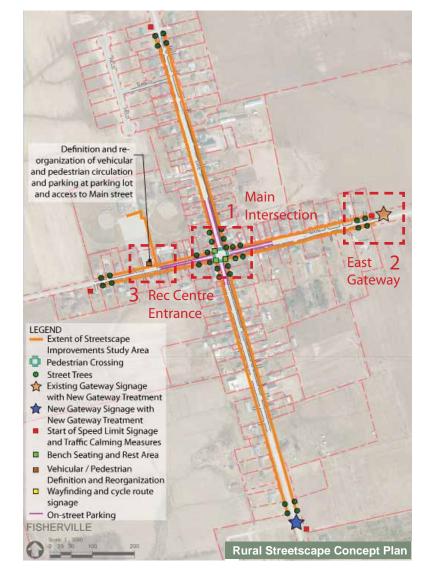

Potential Design Direction

- Agriculture theme
- European heritage

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

6.0 FISHERVILLE

Legend

7.1 Hamlet Overview

Rainham Centre is a small hamlet comprised of 19 hectares of land, located at the intersection of Rainham Road and Kohler Road (Haldimand Road 8) in the south central portion of the County just north of Lake Erie.

The predominant land use in Rainham Centre is residential with two commercial properties in operation, a museum and a community hall.

7.2 Unique Qualities

- Minor crossroads within the County
- Canadian Drilling Rig Museum
 (established in 1996)
- Small community hall with baseball diamond (functionality of field is questionable)
- 2 cemeteries
- Dairy Freeze shop popular destination in summer months
- Proximity to Lake Erie
- Vacant lot on south west corner of main intersection
- Proximity to Selkirk / Kindy Airstrip

7.3 Key Issues

- Sidewalks only on south west side for a short distance – safety issue
- Lack of street furnishings
- Speed of traffic on Rainham Road is a concern - East-west traffic has no stop sign, north and south traffic must stop at intersection
- Baseball diamond in need of maintenance
- Lack of businesses within the four corners to act as a year-round attraction - does not feel like a "destination"
- No clearly defined identity for hamlet

7.4 Visual Inventory

7.5 **Opportunities**

Circulation

- Potential pedestrian areas and sidewalks throughout
- Pedestrian linkages to community hall and baseball diamond, and museum
- Enhance pedestrian and cycling linkages to Lake Erie
- Traffic calming measures may include narrowing the roadway, pedestrian paving at crosswalks, street tree planting, on-street parking, etc.

Identity

- Enhance the historic crossroads within Rainham Centre
- Strengthen the four corners with colourful banners, flowers, benches, etc.

Amenities

- Potential redevelopment site at vacant lot on south west corner (currently privately owned)
- Wayfinding signage related to local amenities, trail and cycling routes
- Seating areas and rest nodes
- Dairy Freeze and Lakeside Convenience properties are both potential candidate for property improvements

Programming

- Create more opportunities to stop and take part in activities and events, rather than drive through
- Promote the Canadian Drilling Rig Museum as a landmark feature for Rainham Centre
- Promote Rainham Centre as a service centre for County cycling routes

Environmental

- Ensure that mature street trees are protected to provide shade
- Provide more street trees at main intersection

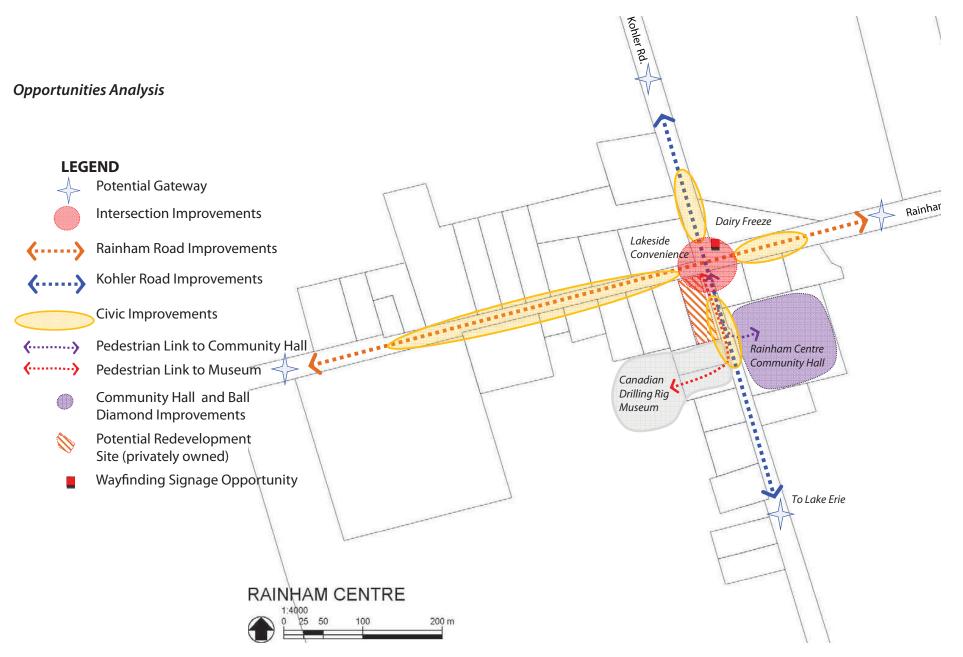

Big Moves

- Traffic calming measures and pedestrian-oriented main intersection utilizing specialty paving, clearly defined crosswalks, streetscape amenities (lighting, benches, planting, garbage / recycling receptacles, etc.)
- Pedestrian rest node / seating area
- Enhanced pedestrian connections to Canadian Drilling Rig Museum and Rainham Centre Community Hall

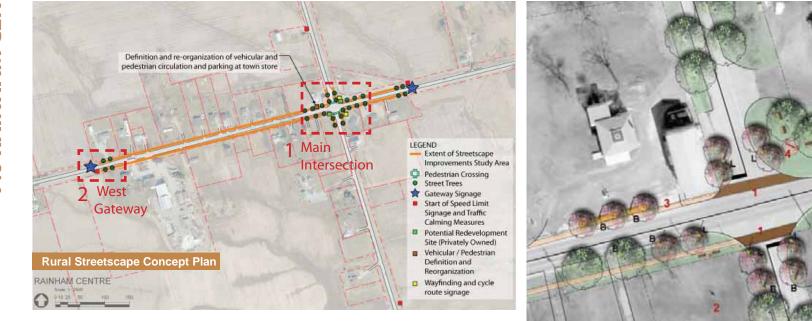

Potential Design Direction

- Drilling heritage theme
- Agriculture theme

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

в

8.1 Hamlet Overview

Port Maitland is a small hamlet, 14 hectares of land in size, located on Port Maitland Road, south of Kings Row, in the south east portion of the County. The hamlet is situated at the mouth of the Grand River with a sizable park located along the Grand River.

The village of Port Maitland, at the mouth of the Grand River possessed the best harbour on the north shore of Lake Erie, and was home to the first settlers in the area. At one time the Welland Canal was connected to the Grand River by a canal, making Port Maitland an ideal place to serve as a Royal Navy depot during the War of 1812. Though intended in the event of war to accommodate three frigates and 1,000 men, the base actually supported only the four schooners which then made up the British naval force on Lake Erie. The wharf and four buildings were washed away in a storm in 1827, and the remaining buildings had largely fallen into ruin by 1834, when the establishment was abandoned. The lighthouse, originally established in 1830, marks the passageway from the Grand River to Lake Erie.

8.2 Unique Qualities

- Popular fishing area
- Public boat launch and parking lot
- Pier, lighthouse and fog station
- Not located on a main road (lack of fast moving traffic)
- Rich historical presence (Grand River Naval Depot 1815)
- Large, well used green space
- Popular destination during summer months, long weekends and holidays

Port Maitland (undated)

8.3 Key Issues

- Periodic / seasonal flooding of parkland, parking lot and roadway
- Hydro poles and wires located on Port Maitland Road are a visual distraction to views of the park, lake and river
- Lack of delineation of the right-of-way no clearly identified pedestrian zone
- No boat mooring available
- Boat launch in need of repair
- Parking a problem on busy weekends
- No designated accessible parking available
- Lack of seating during busy season
- Dangerous undertow in water
- Unsightly algae and debris on beach
- There is a need for a snack bar/ eatery (tourist shop / convenience)
- Private property maintenance is a concern
- Entry sign to Port Maitland is not visible from the roadway

8.4 Visual Inventory

8.5 **Opportunities**

Circulation

- On and off street parking opportunities
- 20 metre right of way width allows for boulevard improvements for pedestrians
- Delineate clear pedestrian crosswalks to access park and pier area
- Link Port Maitland with other communities by providing signed cycle routes on roads

Identity

- Strong pedestrian realm with sidewalks
- Signage upgrades and maintenance
- Opportunity for gateway feature
- Flowers and streetscape planting

Amenities

- Encourage concession stand
- Upgrades to the washroom facilities (more permanent solution)
- Former motel building (now rental apartments) is potential candidate for property improvements
- Wayfinding signage related to amenities, trail and cycling routes
- Investigate possibility of pedestrian lighting
- Opportunity for boat moorings

Programming

- Incorporate a nautical theme
- Lighthouse Keeper Property (MTO lands) provides the potential for heritage interpretation, among other elements
- Promote Port Maitland as an attraction for County cycling routes

Environmental

- Clean up beach area algae / debris
- Improved signage regarding undertow as warning and education for beach users

Big Moves

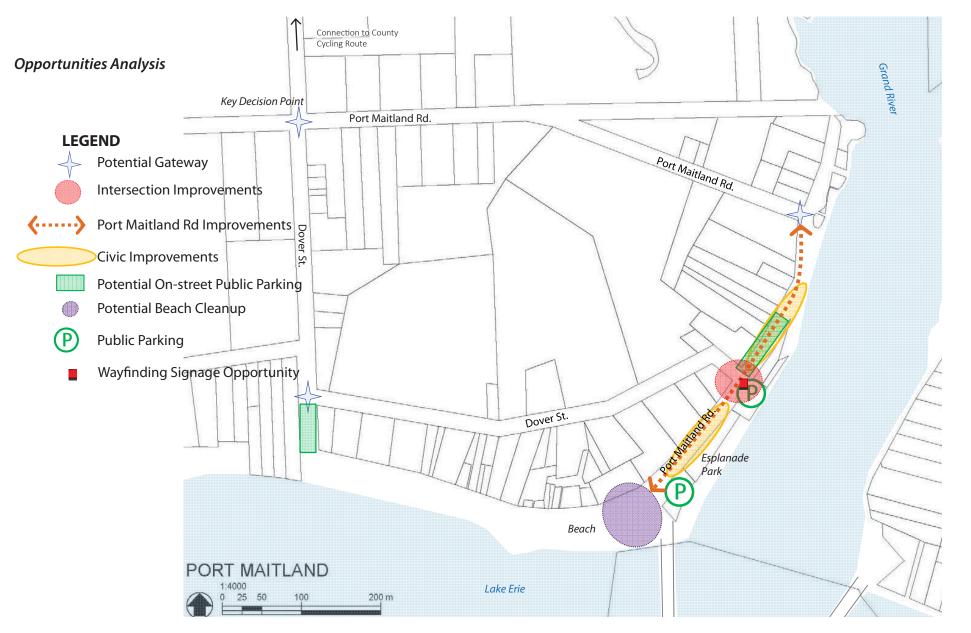

- Organized on-street parking on Port Maitland Road
- Pedestrian realm clearly defined (specialty paving at sidewalks, crosswalks, etc.)
- Washroom facilities and concession stand
- Beach enhancements
- Organized beach access point at Dover Street

Potential Design Direction

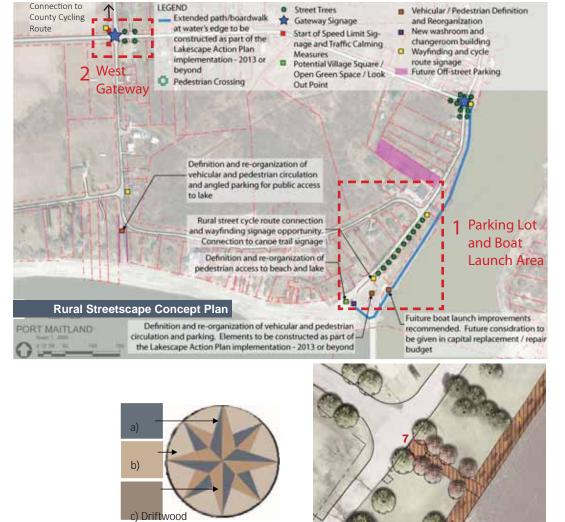

- Nautical / fishing theme
- Beach theme

The opportunities and analysis presented provides the quantum of opportunities, and is is not intended to be interpreted as a plan of action for implementation. The concepts and renderings, as follows, represent a public realm improvement action plan based on appropriateness of scale relating to the function of the community and long term sustainability related to operations and maintenance.

8.6 Streetscape Concept Plans

Mariner's Star Detail (N.T.S)

Note: Some elements in the concept plan above are to be constructed as part of the Lakescape Action Plan (LAP) implementation, 2013 or beyond.

THEMES: Use of Mariner's Star to reflect Nautical Theming •Use of paving colours of Cobalt Blue, Sandy Beige and Driftwood •Use of accent colours of blue, white and green in banners and planting

Detail Gateway/Signage Feature

- 1. Existing Metal Bench
- 2. Trash Receptacle
- 3. Planter

Note: The installation of trash receptacles shall align with current service levels where such service presently exists. Existing fixtures shall be replaced to ensure cohesive public realm. Where service does not presently exist, the Count will consider providing such enhancement upon review of scale and feasibility.
